

# Proprietary S-55 Casing Information

*“Specifically designed for Kansas operators to deliver the highest quality at the best value.”*

What does S-55 mean?

S = Sunrise Oilfield Supply

55 = 55,000 PSI Minimum Yield

Manufactured by Domestic ERW mill to Sunrise specifications

- ◆ Made from Domestic prime steel coils
- ◆ Made to 55,000 minimum yield
- ◆ Manufactured where no Martensite is present in the weld line area (Martensite - hardness in the weld line area)
- ◆ Electromagnetic inspection of the weld line to secure quality weld
- ◆ Wall thickness and Ovality tested
- ◆ Sample windows cut for mill lab testing
  - ◆ Flattening (Crush) test
  - ◆ Chemical composition
  - ◆ Steel properties (Yield & Tensile)
- ◆ Hydrostatic testing done on percentage of production
- ◆ Mill test reports for each heat number

Processed by Domestic threading facilities

- ◆ Drifted and tested to API specifications after threaded and coupled
- ◆ Couplings applied are API K55
- ◆ Samples EMI inspected—100% white banded

Samples sent to third party lab for testing of:

- ◆ Tensile properties (Yield & Tensile)
- ◆ Chemical composition
- ◆ Flattening (Crush)
- ◆ Wall thickness
- ◆ To confirm that no Martensite is present in weld line area
- ◆ Rockwell hardness verification

- ◆ Performance properties available
- ◆ Sizes: 5-1/2" 14# STC R3 and 5-1/2" 15.50# LTC R3  
4-1/2" 10.50# STC R3 (available soon)
- ◆ Current stocking locations:
  - ◆ Ness City
  - ◆ Hays
  - ◆ El Dorado
  - ◆ Oklahoma City and El Reno, OK

This is NOT reject API or Limited Service casing.
